

JTP5501 – High Temperature Resistant by SmartSeal®

JTP5501 is a TPC-ET based thermoplastic polyester elastomer with advanced properties at high temperatures. It combines good resilience, temperature and chemical resistance with strength and durability.

JTP5501 can be used as wipers, back-up rings and rod seals, pre-loaded with elastomer O-rings.

- ✓ Working Temp. Range: -30°C to 120°C
- ✓ Color: Orange
- ✓ High temperature resistance
- ✓ Extrusion resistance
